experience

2013–Now

Deluxe Corporation

Dunwoody, Georgia

Senior Software Engineer

Developed new features SaaS based financial reporting platform and SaaS based data-driven marketing platform. Maintained existing legacy codebase while engineering new RESTful service API layer & Angular UI Layer. Worked closely with BA and SME to drive ROI and deliver rebranded Credit Union solution. Lead team of interns in project to migrate existing WCF service to RESTful service Detailed achievements:

- Developed Automated build pipelines using Groovy & Jenkins
- Increased RESTful API footprint & Implemented React UI Layer
- Learned how to make more amazing coffee on a new machine

Software Development Intern

Fixed bugs and took lead on UI redesign and refactor for SaaS financial reporting platform. Implemented Bootstrap CSS framework & EmberJS / handlebars UI layer

2011–2013

SAP (Formerly Sybase) (18 months)

Alpharetta, Georgia

Quality Assurance / Software Development Intern

Maintained and executed HP Quality Center tests for Mobile device management platform. Developed internal application leveraging AD authentication to automate VM and database creation & management. Maintained Data Loader project that automated data entry to allow QA to load test the system.
